

# **PURGE-EF**

*ENGINE OIL SYSTEM FLUSH*

The **complete** cleaning package for all engine oil systems

**PURGE-EF** is the only oil system cleaner you'll need because it .....

- ▼ Rapidly penetrates oil deposits
- ▼ Removes deposits from sumps
- ▼ Removes deposits from oil galleries and passages
- ▼ Frees sticky lifters and hydraulic chain tensioners
- ▼ Protects against corrosion
- ▼ Is safe and easy to use

Which means ....

- ▼ Less contamination in your oil system
- ▼ Less wear
- ▼ Smoother running
- ▼ More power
- ▼ Longer engine life
- ▼ Optimised performance between oil changes

How it works ....

- ▼ PURGE-EF rapidly penetrates deposits to break them down, allowing them to be taken up into the oil. It does not have to rely on dissolving the deposit to remove it from the surface, making PURGE-EF more effective.
- ▼ PURGE-EF has an incredibly strong affinity for metal surfaces, easily penetrating oil deposits. The result is a lifting effect that allows the deposits to be removed, and prevents material from re-depositing when draining the oil.

**Simple and easy to use ....**

Add to the old engine oil just prior to changing

Run the engine for 15 - 20 minutes

Allow the engine to sit for 30 minutes

Drain and fill with new oil.....that easy!
